Deja Thoris
Grand Master, Inter-Planetary Council
Orion Solar Group X94A10
Substation ZZ47

Dear Ms. Thoris,

I am deeply honored by your invitation to be a Star Fleet Captain for the mission to the Canis Major star group. I have followed the advances made by the Galaxy Star-Seed program since its inception. The process of making a desolate planet capable of sustaining life has always intrigued me. In addition, I have always wanted to lead an expedition into an uncharted region of the galaxy. Your invitation has made this childhood dream a possible opportunity for me.

However, if you check the Council's main computer, you will find that my current commission is for the Inter-Planetary Council to observe our relatives left here on planet Earth. This was part of the survival experiment started by Doctor Tal Hajus. The file number is X31E12-ZETA-USA. My tour of duty will extend well into the year 2001 (Earth time).

A close friend, Terren Kalisis has informed me that you are considering him for the position as well. I have known Terren for many years and I can safely say that he is more than qualified to be a Star Fleet Captain.

Thank you for considering me for this command position. Feel free to contact me in the early part of the year 2001.

May the Force be with you.

Sincerely,

Gregfolio Company (Technical Writing Lesson – Rejection Letter)
